

Sonic Visualiser Tour

CHARM Symposium

30 June 2006

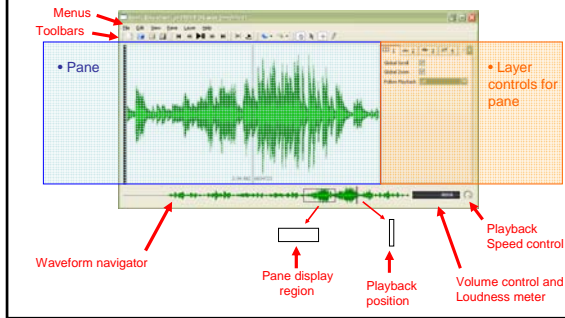

Craig Stuart Sapp

Primary Purpose of SV

- Align audio and analyses in time

SV Main Window Components

Menus

File	File	For loading and saving audio files and annotation layer information.
Edit	Edit	Mostly selection controls and copy/paste/undo commands
View	View	Text overlay controls and navigation controls
Pane	Pane	Pane controls (Pane = a display window)
Layer	Layer	Layer controls (Layer = a layer in a pane)
Help	Help	Help and information materials

Toolbars

• Important to understand mouse modes:

	Navigate	Mouse is used for panning left/right in pane
	Select	Mouse is used to select time regions (behaviour is slightly different in different layer types).
	Edit	Mouse is used to change data in active layer.
	Draw	Mouse is used to add data in active layer.

Using Dials

- Tricky to get used to: takes practice
- Don't think in terms of twisting to change values

• Click-drag left/right or up/down to change values

LAYERS

Pane Layer

Pane layer tab

How display updates when playing an audio file:

1. **Scroll** – continuous update of display
2. **Page** – update display to next page when playcursor gets to end of pane.
3. **None** – don't update display (good for slower computers)

Ruler Layer

Ruler layer tab

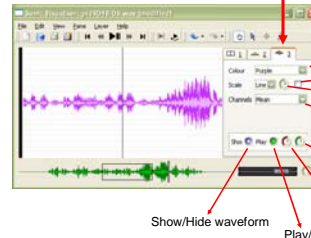

Colour of ruler lines.

Show/Hide the ruler layer

• Notice that active layer is display on top of other layers.

Waveform Layer

Waveform layer tab

Colour of waveform

Automatic gain

Manual gain

Display style

Pan to left/right speaker

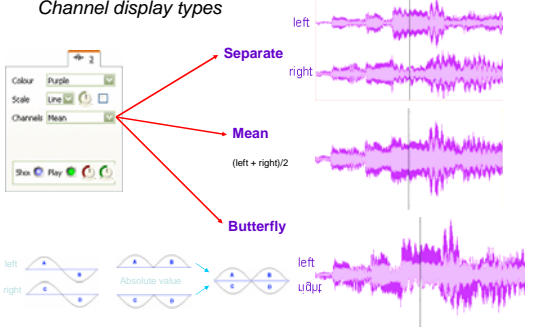

Show/Hide waveform

Play/Mute

Layer volume

Time Grids

• Example chromagram plugin grid data

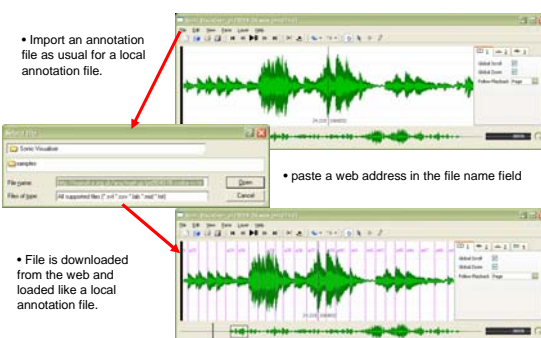

B	0.52094	0.57474	0.49028	0.57031	0.52179
AA	0.47668	0.48972	0.45764	0.49440	0.43262
A	0.44996	0.44622	0.45775	0.43288	0.44878
GA	0.32042	0.32042	0.32042	0.32042	0.32042
G	0.32042	0.32042	0.32042	0.32042	0.32042
FA	0.27793	0.24328	0.28776	0.24467	0.27793
F	0.27793	0.24328	0.28776	0.24467	0.27793
E	0.18888	0.18888	0.18888	0.18888	0.18888
DA	0.18888	0.18888	0.18888	0.18888	0.18888
D	0.18888	0.18888	0.18888	0.18888	0.18888
CA	0.18888	0.18888	0.18888	0.18888	0.18888
C	0.18888	0.18888	0.18888	0.18888	0.18888

• Load data files with setting: "A set of values at a time"

• Zooming in shows individual numbers in grid

Downloading Web Annotations

- Import an annotation file as usual for a local annotation file.
- paste a web address in the file name field
- File is downloaded from the web and loaded like a local annotation file.

Spectrogram Layer

Creating a spectrogram

- Create a new spectrogram pane by selecting "Add Spectrogram" from the "Pane" menu.

Active pane marker

- Create a new spectrogram in the current pane by selecting "Add Spectrogram" from the "Layer" menu.

Active layer is shown on top of other layers

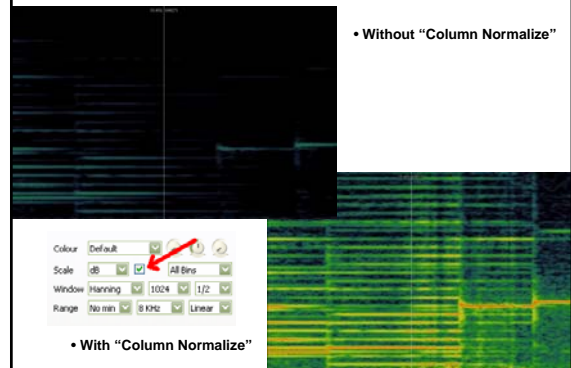

Spectrogram Layer Controls

Hold mouse over a parameter to display its name as a tooltip.

- Colour** a = colouring scheme
 b = threshold c = gain d = rotation
- Scale** e = display: **amp** in dB, **linear** or **meter** or **phase**
 f = fit columns to maximum colour range
 g = display type: raw DFT (*all bins*), peaks only, or detected frequencies
- Window** h = analysis window
 i = window/transform size j = hop ratio
- Range** k = lowest frequency in display
 l = highest frequency in display
 m = vertical scale: Linear (for equally spaced Harmonics) or Log (for equally spaced pitches)

Auto Normalizing

• Without "Column Normalize"

• With "Column Normalize"

Harmonic Cursor

Go into "Select" mode to activate harmonic cursor

Identifying pitches with HC

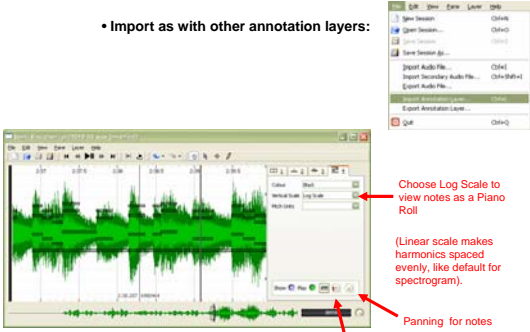

• Example of a chord with three notes

Note Layer

Importing a MIDI file

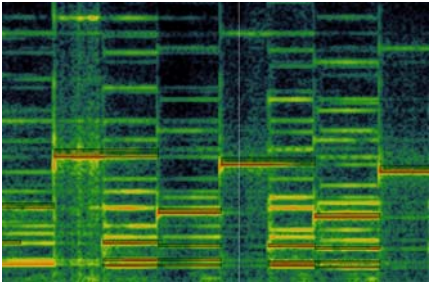

• Import as with other annotation layers:

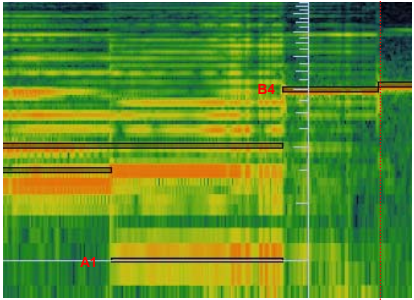

Choose Log Scale to view notes as a Piano Roll
 (Linear scale makes harmonics spaced evenly, like default for spectrogram).
 Panning for notes
 Volume for notes

Note + Spectrogram Layers

- Notes indicate where pitch frequencies are located
- Harmonics are everything else (if MIDI file is correct)

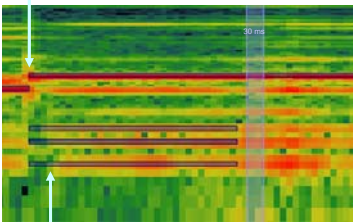

Pedaling

Pedal up

LH/RH coordination

RH note

LH notes occur about 30 ms later

TAPPING

Tapping to performances

- Press numeric Enter key to insert a marker at the current time. (can be done while audio is playing or stopped)
- SV adds a time-instant layer for the tap times, or inserts them in the current layer if it is a time instant layer.

Time instants will appear in the pane while the audio plays

Time instants labeled sequentially

Laptop Tapping

- If using a laptop computer without an extended keyboard, you can use the on-screen keyboard to click with the mouse:

Enter key

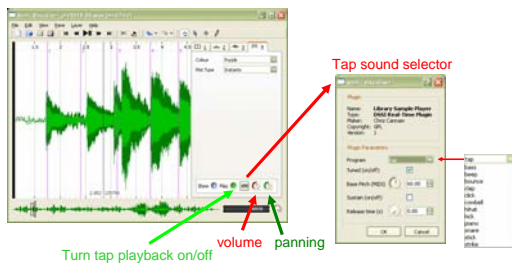

- To open the on-screen keyboard in Windows:

Start menu → Programs → Accessories → Accessibility → On-Screen Keyboard

Tap playback

- By default taps will be played back with audio playback

Tapping Evaluation

- Long-term accuracy is very good

- Time quantization is not so great, but is OK

- Local accuracy decreases by 40% (35 ms sd compared to 20 ms)
- Multiple tapping sessions can remove quantization errors

PLUGINS

Vamp Plugins

- 3rd parties can add their own audio analysis functionality to Sonic Visualiser
- see list at <http://sv1.sourceforge.net/vamp.html>

• default plugins:

Spectral Centroid: Linear Frequency Centroid
Spectral Centroid: Log Frequency Centroid
Zero Crossings: Zero Crossing Counts
Zero Crossings: Zero Crossings

• C4DM@QMUL plugins:

Chronogram...
Constant-Q Spectrogram...
Tempo Tracker: Detected Beats...
Tempo Tracker: Beat Detection Function...
Tonal Change: Tonal Change Positions...
Tonal Change: Tonal Change Detection Function...
Tonal Change: Transform to 6D Tonal Content Space...

• audio-based plugins:

<http://aubio.piem.org>
(linux only?)

Chronogram...
Harmonic Spectrogram: HS raw pitch estimate...
Harmonic Spectrogram: Spectral power...
Harmonic Spectrogram: Spectrogram...
Nevermore Spectrogram...
Power Curve: Scaled Power Slope...
Power Curve: Raw Power...
Power Curve: Smoothed Power...
Power Curve: Smoothed Power Slope...

- See <http://sv.mazurka.org.uk> for Mazurka Project related plugins

MzChronogram <http://sv.mazurka.org.uk/MzChronogram>

waveform display

A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T
A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T
A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T
A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T

 chromogram display

Waveform:

Chronogram:

• Each pitch has a different visual character

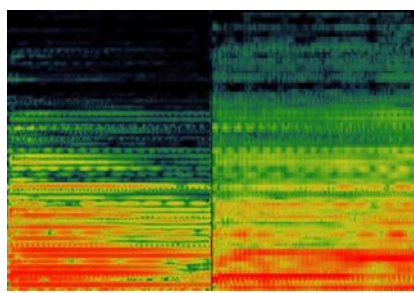

Plugin Input Parameters

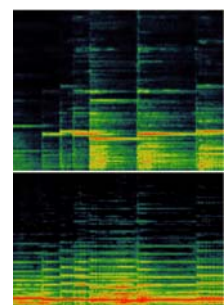

- Numbers with units
- Enumerated lists
- Numbers without units
- Parameter names
- Parameter values

MzNevermore

- Raven-like (and Praat) spectrogram display
- Independent analysis window / transform sizes

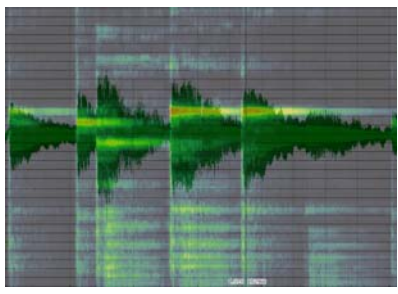

MzHarmonicSpectrum

(+ left-hand chords)

- Harmonic Spectrum
- Regular Spectrum

Harmonic Spectrum (2)

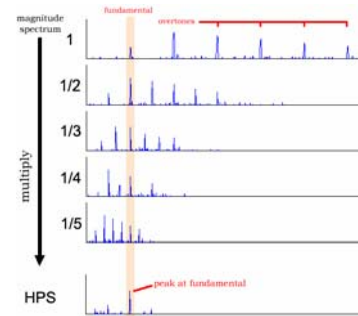

Harmonic Spectrum (3)

• Geometric mean of the energy at each suspected harmonic.

$$HPS(k) = \left(\prod_{n=1}^N Y(n \cdot k) \right)^{\frac{1}{N}}$$

multiply

magnitude spectrum
 1
 1/2
 1/3
 1/4
 1/5
 HPS

fundamental
 overtones
 peak at fundamental

MzHarmonicSpectrum (4)

Downloading Mazurka Plugins

• <http://sv.mazurka.org.uk/download>

If indexes

Save any of the following .dll files into the directory C:\Program Files\Vamp #Plugins

plugin name	dynamic library	file size	version	compile date
mazurka_plugins.dll		1.378 MB		25 Jun 2006
	sv\Chorusgran		200605270	25 Jun 2006
	sv\HarmonicSpectrum		200606190	25 Jun 2006
	sv\Reverb		200606170	25 Jun 2006
	sv\WaveCurve		200606210	25 Jun 2006
mazurka_plugins.dll contains the following individually compiled plugins, so you do not need to download any of these individual plugins if you download the main set				
sv\Chorusgran	3\MzChorusgran.dll	462 KB	200605270	25 Jun 2006
sv\HarmonicSpectrum	3\MzHarmonicSpectrum.dll	1.3 MB	200606190	25 Jun 2006
sv\Reverb	3\MzReverb.dll	1.293 MB	200606170	25 Jun 2006
sv\WaveCurve	3\MzWaveCurve.dll	1.295 MB	200606210	25 Jun 2006
Below is a list of plugins which are not part of the main mazurka plugin set (listed above) since they are for demonstration purposes or are in the initial phase of development				
sv\ReverbGran32bit	3\MzReverbGran32bit.dll	450 KB	200606260	25 Jun 2006
sv\ReverbGranFFT32	3\MzReverbGranFFT32.dll	1.284 MB	200606260	25 Jun 2006
sv\ReverbGran32bit	3\MzReverbGran32bit.dll	447 KB	200606260	25 Jun 2006

REFERENCE

Some Useful Keyboard Shortcuts

- Space bar = Start/stop playing audio
- Numeric Enter = Insert a time instant (tapping)
- ALT + # = Go to layer # in current pane
- 1, 2, 3, 4 = Switch between the 4 mouse modes: Navigate, Select, Edit, Draw
- ← → = move pane display slightly to the left or right
- ↑ ↓ = zoom time in/out
- CTRL + ← → = page to the left or right
- 0 = Hide on-pane text messages
- 9 = Show on-pane text messages
- Home/End = Go to start/end of audio file
- PgUp/PgDn = Scroll selection through regions in current layer
